

DanieLavrano

graphic designer

Born May 5, 1991.

I'm into art, design, sports, and science since childhood. Before completing my studies, I've had the chance to begin my experience in the world of art and communication as a self-taught artist exhibiting in some Italian and foreign galleries (Rossocinabro, MAD Gallery, etc.), collaborating with some magazines (Concorde Magazine), and I appeared with my artworks on websites such as Fubiz. I continued my path working in agencies and the world of communication as a Graphic Designer, learning to do a bit of everything related to this field, from digital to print. Since 2018 I'm a freelancer and I've started collaborating with some agencies and photographers. In 2021 I co-founded StudioKoel, an artistic laboratory that ranges from design to music.
